JANE BILLS BTEC

Chester Laser Aesthetics is based at Chester Wellness Centre and we use the N-Lite laser to provide treatment for acne, vascular conditions and skin rejuvenation. All our treatments have been FDA approved and have CE clearance for Europe. The Centre was set up under the regulation of the Care Quality Commission and has been accredited for the treatment of children.

LASER SKIN TREATMENTS WITH N-LITE LASER

Using the most advanced and effective laser technology Chester Laser Aesthetics provides treatments for a range of skin conditions – lines and wrinkles, thread veins, rosacea, pigmentation, acne and acne scarring. Our specialist laser therapists are qualified to the highest standard, experienced in laser application and have an extensive knowledge of skin care.

Prior to any treatment we assess your skin condition and advise on the appropriate course of treatment to achieve the best outcome. Our treatments use the latest N-Lite V laser technology and by combining this with the best non-surgical solutions (microdermabrasion and medical peels) we can get astonishing results for our clients.

At any age a skin condition can be a great source of psychological and emotional distress and our aim is to use our knowledge and skills to offer treatments which can help our clients feel more confident in themselves.

Whatever your condition – scarring, ageing skin, pigmentation, acne – we can tailor a course of treatment for you. The treatment programme will be explained to you and you will be advised as to the results that may be expected, including the time needed for the effect to be seen. Depending on your condition some treatments give results quite quickly, others may take longer. Whatever your problem, with our care and treatments your skin can be left feeling healthy, smooth and blemish free.

Microdermabrasion and medical peels complement the treatments enhancing the results. They can also be given as stand alone treatments.
