JANE BILLS BTEC

Lasertrolysis UK Ltd is based at Chester Wellness Centre and uses the most advanced and effective laser technology for permanent hair reduction. All treatments have been FDA approved and have CE clearance for Europe. Our specialist laser therapists are qualified to the highest standard, experienced in laser application and have an extensive knowledge of hair reduction techniques. The Centre is fully inspected, licensed and regulated by The Care Quality Commission and has also been accredited for the treatment of children.

Laser hair removal is a medical procedure that removes unwanted hair and works by passing a light beam through the skin. The laser beam picks up 'melanin' (pigment) in the hair and destroys the matrix (birthplace) of the hair by travelling down the pigmented hair.

At Lasertrolysis UK Ltd we use a Light Sheer Diode laser. It has an excellent success rate of 98% and is used for the purpose of treating all types of hair, except grey, light and medium blonde hair.

There are many methods to remove unwanted hair, but laser hair removal is the most effective treatment available.

- Clinically proven treatment for the removal of unwanted facial and body hair
- Treatment is gentle, quick and effective
- Removes unwanted hair using the most up to date technology
- Enables you to wear the clothes you wish
- Renews your confidence
- Makes you feel less self conscious
- Minimal down time
- No risk of scarring

In most cases it takes approximately six treatments to become hair free in any one area
