

Chester Laser Aesthetics Skin Specialists are experts in the most advanced medical rejuvenation treatments on the market. Using state of the art equipment they receive regular referrals from Doctors and Surgeons.

YOUR BEAUTY | YOUR CHOICE

LASER AND RADIOFREQUENCY treatments for the face and neck are hugely effective and popular. Used for medical level skin rejuvenation which includes, toning and tightening, plumping of the skin, diminishing fine lines and wrinkles, reducing sun damage and smoothing out rough skin or large open pores. They can also treat deeper skin concerns such as scars, acne scars and hyperpigmentation changes.

We also offer **eDERMASTAMP**, a precision designed, electrically powered medical device from the makers of the Genuine Dermaroller. Designed to give greater control over intensive skin needling procedures, allowing change of depth and speed of needle work while reducing any discomfort. Used for Acne Scars, Photo-damaged and Ageing skin, lines and wrinkles and stretch marks. The eDermastamp creates thousands of micro medical needle columns into your skin, each one penetrating into the dermis layer, encouraging it to regenerate and repair itself.

Single.....	£ 250
Course of 3	£ 750
Course of 5	£1,100

WE RECOMMEND booking your **FREE CONSULTATION** to understand which is the best for you.

ENDYMED PRO 3 DEEP

Prices for the Endymed Pro are varied and will be quoted after your **FREE CONSULTATION**.

This machine is used and recognised by Plastic Surgeons world wide for its incredible skin toning, tightening and resurfacing results on the face and neck. It uses patented Radio Frequency technology and has an excellent safety profile for all skin tones and colours.

N-LITE V LASER

A medical laser which has been designed to supply exactly the right amount of energy to small blood vessels; taking them to the brink of damage therefore maximising collagen stimulation and resulting in an extremely effective treatment for skin rejuvenation. Particularly scars, lines/wrinkles, acne and thread veins.
